SUMMARY

B.Tech Information Technology graduate with hands-on experience in programming, application development, and data analysis through academic projects and an internship. Eager to start my career in an entry-level technical role where I can apply my skills, continue learning, and contribute to real-world solutions.

SKILLS

Programming Languages: Java, Python, SQL
Web Technologies: HTML, CSS, JavaScript
Data & Analytics: Data Analysis, Data Visualization, Power BI, Excel
Tools & Platforms: Git/GitHub, Figma, Canva

INTERNSHIP

Data Analysis Intern — Elysium Technologies, Madurai **2024**

- Learned the end-to-end data analysis workflow, including data cleaning, exploratory analysis, predictive modeling, and visualization using Python in Anaconda's Spyder IDE.
- Applied these concepts to analyze an Indian children's screen-time dataset through data cleaning, exploration, and pattern identification.
- Created visualizations using Matplotlib to identify and interpret trends in the dataset.

PROJECTS

Electricity Usage Anomaly Detector **Python | Pandas | Scikit-learn | Power BI**

- Resampled minute-level household power data into 1,442 daily usage records using pandas.
- Applied Isolation Forest to flag unusual consumption days without labeled data, and cross-checked results against a statistical threshold, finding 98.3% agreement.
- Built a Streamlit app to visualize anomalies and a Power BI dashboard to show usage trends.

Live Demo: Electricity monitoring

MedShare – Medicine Donation Platform **HTML | CSS | JavaScript | Node.js | Express.js | MongoDB**

- Built a full-stack platform with three user roles — donor, recipient, admin — using Express.js and MongoDB.
- Added JWT authentication with bcrypt password hashing, role-based access control, and 17 REST endpoints across 3 MongoDB collections (User, Medicine, MedicineRequest).
- Built an admin approval workflow that sends automatic email updates to donors and recipients.

Live Demo: Medshare

ConsentSync – Privacy Policy Analyzer **HTML | CSS | JavaScript | Chrome Extension APIs**

- Built a Manifest V3 Chrome extension using a background service worker and content scripts to check privacy policies, cookies, and site permissions.
- Tracked cookies in real time using Chrome's cookies API, and read camera, microphone, and location permission status using the contentSettings API.
- Scored each site 0–100 using a rule-based keyword system that checks policy text, permissions, cookies, and connection security, with multilingual support.

ACHIEVEMENT

- Won 1st Prize at TechUtsav'25, Thiagarajar College of Engineering, for analyzing business data using Power BI and developing interactive dashboards to visualize KPIs and trends.

EDUCATION

B.Tech Information Technology	Velammal College of Engineering & Technology	CGPA:8.28	2022-2026
HSC	MRR.MAVMM. Matric Higher Sec School	87.3%	2022
SSLC	MRR.MAVMM. Matric Higher Sec School	72.6%	2020

CERTIFICATIONS

Microsoft & LinkedIn – Career Essentials in Generative AI

AWS – Cloud Practitioner Essentials

Great Learning – Oracle SQL

IBM – Data Science 101 (CognitiveClass.ai)
